12T1 = implies player in that row played against player in row numbered 12 and obtained a total of 1 goal after the two games. The points are not indicated for a round but are inferred from the goals obtained. Xx implies that the player did not turn up for day 2 competitions except for Dan Isabirye who gave up playing to attend to officiation business.

The end of year pool checkers tournament attracted a record turn up of players of 73 participants. The best 16 players were to earn prize money that was totaling to 1,000,000/= Ugandan shillings. The would be sponsor of this event withdrew a week to the event because he expected to have at least 100

players register for the event and the deadline passed when we had only 32 registered players and postponed his sponsorship to June 2017 expecting that the numbers will be realized then. The executive of UDF helped again by the would-have-been sponsor raised the 1,000,000/= that made the participants to be more than ever realised. The event was played under rapid time of 5 minutes and 2 seconds per move and was expected to last one day. There were officiation challenges that forced the event to extend to the second day. Due to the extension of the tournament to the 2nd day, some players failed to turn up. The ranking of the participants was therefore determined on goals scored for those who tied in points instead of using total points of opponents played as this would disadvantage players whose opponents did not turn up for day 2.

Results compiled by

Dan Isabirye, MF

Technical Director, UDF
